User stories

ID	User Story	Status
User-Cat1	As a visitor, I want to browse content by category (Food, Language, Traditions etc.) so I can find topics that interest me.	Complete
User-Cat2	As a visitor, I want to see how many post exist in each category so I know what topics are the most popular.	Complete
User-Cat3	As a visitor, I want to be able to browse content by country so I can choose what culture I want to learn.	Complete
User-Cat4	As a visitor, I want to see popular tags so I can find trending content.	Complete
User-Cat5	As a visitor, I want to click on a category to view all posts in that category so I can find related content	Complete
User-Usr1	As a visitor, I want to view a list of all community members	Complete
User-Usr2	As a visitor, I want to be able to view a user profile	Complete
User-Post1	As a visitor, I want to browse a list of all posts	Complete
User-Post2	As a visitor, I want to click on a post to view all details	Complete

Database design

Table Name: Users

Field Name	Data Type	Description
Id	INT (Primary Key)	Unique user ID
Name	VARCHAR(100)	User name
Country	VARCHAR(100)	User culture
Language	VARCHAR(150)	Language spoken
Interests	VARCHAR(255)	User interest
Bio	TEXT	User biography

The User's table was designed to store key information about each user within the Cultural Connections platform. It includes fields such as name, country, language, interests, and a short biography, allowing each user to represent their cultural background and personal interests. The table uses a unique ID as the primary key to ensure that each user can be identified individually. This structure supports the functionality of the application by enabling users to be displayed in a list and accessed through individual profile pages. Overall, the Users table provides a clear and organised way to manage user data and supports the cultural sharing aspect of the system.

Gencyigb Revise user interests and post descriptions

Code Blame 34 lines (30 loc) · 1.14 KB

```sql
DROP TABLE IF EXISTS users;
DROP TABLE IF EXISTS posts;

CREATE TABLE users (
    id INTEGER PRIMARY KEY AUTOINCREMENT,
    name TEXT,
    country TEXT,
    language TEXT,
    interests TEXT,
    bio TEXT
);

CREATE TABLE posts (
    id INTEGER PRIMARY KEY AUTOINCREMENT,
    title TEXT,
    country TEXT,
    content TEXT,
    user_id INTEGER,
    FOREIGN KEY(user_id) REFERENCES users(id)
);

INSERT INTO users (name, country, language, interests, bio) VALUES
('Layla', 'Turkey', 'Turkish, English', 'Food, Festivals', 'Sharing Turkish traditions'),
('Oliver', 'UK', 'English', 'Tea, History', 'British culture lover'),
('Mei', 'China', 'Chinese, English', 'Calligraphy', 'Asian traditions'),
('Kai', 'Jamaica', 'English, Creole', 'Music', 'Caribbean culture'),
('Amara', 'Nigeria', 'English, Yoruba', 'Storytelling', 'African heritage');

INSERT INTO posts (title, country, content, user_id) VALUES
('Turkish Breakfast', 'Turkey', 'Olives and tea', 1),
('Diwali Festival', 'India', 'Festival of lights', 2),
('Chinese Tea', 'China', 'Tea rituals', 3),
('Caribbean Dance', 'Jamaica', 'Music culture', 4),
('African Clothing', 'Nigeria', 'Traditional fashion', 5);
```

Figure 1: SQL table structure for Users

```javascript

// Users
const users = [
  { id: 1, name: "Layla", country: "Turkey", language: "Turkish, English", interests: "Food, Festivals", bio: "I love sharing Turkish culture and traditions." },
  { id: 2, name: "Oliver", country: "UK", language: "English", interests: "Tea, History", bio: "British culture enthusiast." },
  { id: 3, name: "Mei", country: "China", language: "Chinese, English", interests: "Calligraphy, Tea", bio: "Passionate about Chinese traditions." },
  { id: 4, name: "Kai", country: "Jamaica", language: "English, Creole", interests: "Music, Dance", bio: "Caribbean culture is vibrant!" },
  { id: 5, name: "Amara", country: "Nigeria", language: "English, Yoruba", interests: "Storytelling", bio: "African heritage lover." }
];

// Cultural posts (listing page + detail page)
const posts = [
  { id: 1, title: "Turkish Breakfast", country: "Turkey", content: "Olives, cheese and tea.", user_id: 1 },
  { id: 2, title: "Diwali Festival", country: "India", content: "Festival of lights.", user_id: 2 },
  { id: 3, title: "Chinese Tea Culture", country: "China", content: "Traditional tea rituals.", user_id: 3 },
  { id: 4, title: "Caribbean Dance", country: "Jamaica", content: "Music and movement.", user_id: 4 },
  { id: 5, title: "African Clothing", country: "Nigeria", content: "Traditional fashion styles.", user_id: 5 }
];
```

Task breakdown

Task	Description	Status	Member
Categories Page Template	Create Categories page with categories cards	Done	Lucie
CSS Styling	Styles created in styles.css	Done	All
Docker Testing	Verify pages work	Done	All
PDF File	Documentation of all work	Done	Lucie
User List Page	Create user list page	Done	Bahar
User Profile Page	User profile list created	Done	Bahar
Posts List Page	Posts list made	In progress	Aderinola
Post Detail Page	Post details created	In progress	Aderinola
Database Setup	SQL database created with data inputted	Done	All

Meetings Record

Date: 10th march 2026

Attendees: Lucie, Bahar, Aderinola

Assigned work:

- Lucie: Categories page, PDF file documentation
- Bahar: Users page and User Profile Page
- Aderinola: Posts pages

I conducted this meeting via WhatsApp and allocated work to everyone. We used this time to discuss what is expected and that everyone was happy with the potential outcome of this sprint. Any miscommunications were cleared up in a constructive way so everyone understood the assignment.
